<ul style="list-style-type: none">MathAi is an interactive web app that uses AI to solve math problems, providing step-by-step solutions and simplifying complex concepts for users.	

KEY ACHIEVEMENTS

- Successfully delivered two freelance web projects, each attracting 500+ monthly users.
- Completed and deployed 30+ frontend projects across GitHub Pages, Netlify, and Vercel.
- Demonstrated expertise in responsive design, API integration, and performance optimization.

Certifications

Web Development SkillCraft Technology	07-2025
Focused on designing and implementing responsive, user-friendly web interfaces using HTML, CSS, JavaScript, and React	
Responsive Web Design FreeCodeCamp	06-2025
FreeCodeCamp’s Responsive Web Design Certification teaches HTML, CSS and responsive principles through five projects, building adaptive, accessible websites.	

Goal

Short-Term Goal As a Frontend Developer, I am to enhance my skills in building modern, responsive web applications, focusing on mastering React and the MERN stack, while gaining practical experience working on real-world projects.
Long-Term Goal My goal is to transition into a Full Stack Developer role, becoming proficient in both frontend and backend technologies, while contributing to the development of scalable, high-performance applications and leading projects focused on cutting-edge web technologies.

Extra-Curricular Activities

Active participation in coding competitions and hackathons.

Areas of Interest

Web Development (Frontend and Full Stack)
Vibing through coding challenges and solving real-world problems.
